100g Optical Module Test Cable

Overview

This video demonstrates the QSFP-100G-AOxxx Active Optical Cable in two real-world scenarios, including detailed scenario setup, connection steps, and test results (raw physical BER: $15E-255$). The 100G transceiver module portfolio offers a wide variety of high-density and low-power 100G connectivity options for data center, enterprise and telecom application. It includes 100G QSFP28 modules, 100G CFP/CFP2/CFP4 modules, 100G DACs/AOCs and their breakout cables. His 100G spine links kept dropping with CRC errors, and the system showed a frustrating mix of interface flapping and unexplained downtime. He had verified all fiber runs, executed switch port diagnostics, and cross-tested the cable plant through an exhaustive equipment exchange process. This low-profile passive QSFP 100G loopback cable features typical insertion loss (attenuation) characteristics of a mere 0dB;. Tektronix Test Instrumentation will get your team ready to tackle the next wave of datacom technologies.
