# **1mm diameter fiber optic patch cord**

## Overview

---

These single mode fiber optic patch cables are FC/APC terminated on both ends, making them ideal for systems that are sensitive to back reflections. The narrow key connector utilizes a ferrule that has an 8° angle polished tip, ensuring typical return loss of 60 dB. Multiple standard lengths are available in simplex and duplex cable construction and latching and non-latching. The Fiber Coupled Broadband LED Light Source utilizes a VIS/NIR phosphor converter to convert the output of a 450nm LED chip into a broad 420 - 900nm spectrum. They are manufactured and tested in compliance with TIA 604 (FOCIS), IEC 61754 and YD/T industry standards.
