APC7 Connector H

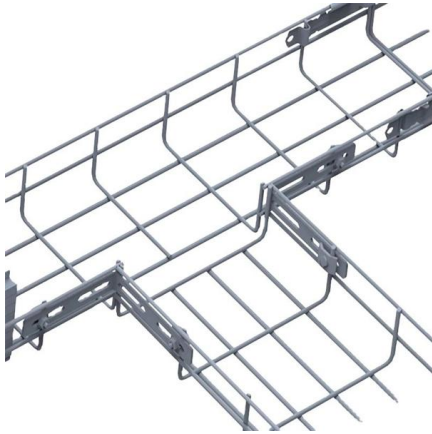

Overview

The APC-7 connector (also referred to as a 7 mm connector) is a precision coaxial connector used on laboratory microwave test equipment for frequencies up to 18 GHz.

These connectors are largely used for laboratory microwave test equipment for frequencies up to 18GHz.

How does an APC-7 connector work? Anyone got a formal specification?

I've been trying for some time to find a formal definition of the APC-7 connector, so that I can model an open-circuit APC-7 using a 3D EM simulator. I believe this was jointly designed by HP and

APC-7 (7 mm) connector. The APC-7 (Amphenol Precision Connector-7 mm) offers the lowest reflection coefficient and most repeatable measurement of all 18 GHz connectors. Development of the

APC-7 connector explained

APC-7 connectors are advantageous because they have a low reflection coefficient, make repeatable coaxial connections, and are genderless. The connectors are expensive, so they are seldom used
