Albania-certified ADSS optical cable G 657A1

Overview

Outdoor dry core (ADSS) optical fiber Multi Loose Tube cable with aramid yarns as strength member and polyethylene outer jacket. ADSS overhead fibre optic cables are fully dielectric and self-supporting telecommunications network elements, with a lightweight multi-tube construction, designed for installation on new or existing pole infrastructure. EasyBand® G657A1 bending insensitive single-mode fibre encompasses all the features of FullBand® fibre and provides good resistance to macro-bending.
