Angle steel supports for vertical cable trays

Overview

Angle steel supports are a more traditional and reliable choice for electrical cable tray support. UNITECH's metal framing channel is cold formed on modern rolling machines from low carbon. The vertical cable ladders STL, STM and STIC meet the exact specifications and definitions of DIN 4102 Part 12 of November 1998, such as height of the cableladder / tray, width of the cable ladder/ tray, proportion of holes in the cable tray, distance between rungs of the cable ladder, material. These tray systems allow excellent ventilation and prevent sagging while routing.

Angle steel supports for vertical cable trays

Cable Tray Ladder Trunking Wire Basket Installation
