Brunei Bridge Construction

Overview

27 that it completed the construction of Temburong Bridge, Brunei's longest bridge. Sultan Haji Omar 'Ali Saifuddien Bridge (Malay: Jambatan Sultan Haji Omar 'Ali Saifuddien, Jawi: الدين سيف علي عمر حاج سلطان جمبتن), also known as Temburong Bridge (Malay: Jambatan Temburong, Jawi: تمبوروغ جمبتن), is a dual-carriageway bridge in Brunei that spans across Brunei Bay, connecting the. The bridge spans approximately 30 kilometers across the Brunei Bay, making it a fully prefabricated bridge that has the most spans in the world and a pioneering feat in movable construction platform technology. BANDAR SERI BEGAWAN (Xinhua): The Temburong bridge linking Brunei's remote Temburong district and the capital was built by joint efforts of hundreds of workers, contractors and suppliers, a minister said at Brunei's legislative council on Thursday. The Temburong Bridge Project, now known as the Sultan Haji Omar Ali Saifuddien (SOAS) Bridge is a significant infrastructure project in Brunei, connecting the capital city, Bandar Seri Begawan, to the Temburong district, which previously had no direct land link to the rest of the country.
