Cable tray engineering layout

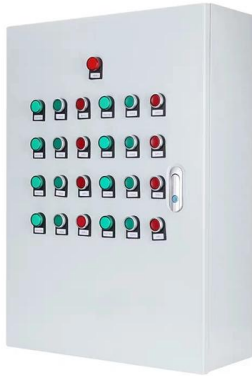

Overview

IEC 61537 provides clear direction on the design of cable trays, including bend radii, supports, and spacing. Cable tray systems must follow straight, logical paths and avoid unnecessary. Cable tray (or cable ladder) systems are a popular alternative to electrical conduit systems, as they have an outstanding record for dependable service, design flexibility and cost savings in commercial and industrial applications. Cable tray layout and section design forms a vital component of detailed engineering in electric and power systems. We want to help electrical engineers, technicians, and anyone working with electrical setups build safe and good systems.
