Cable tray straight leg bend

Overview

You can buy a manufactured 90 degree bend or make one on a cable tray bending machine but in this video I show you how to make one using a metal bar. Characteristic of this steel type is that - prior to mechanical deformation - it is given a zinc coating by means of a continuous dipping process. Swifts cable tray and ladder ranges have been designed and manufactured in Scarborough (UK) since the 1960's. Our inhouse galvanising facility and strict quality control guidelines ensure that every product is finished to the highest possible standard. Maintain spacing or to keep cables in place when the tray is erect the minimum bend radius for cables as they exit the bottom of the cable tray. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray is used for instrumentation and control applications that require. We specialize in providing an extensive selection of cable tray bends designed to meet the specific needs of diverse projects, from gentle curves to intricate directional shifts.
