# **Causes of Cable Falling in Cable Tray Shafts**

## Overview

---

Cable sag results from incorrect spacing of cable tray supports or from employing the incorrect tray type that is, light-duty perforated trays in high-load applications. Cable tray failures can cause operational disruptions, equipment damage, and safety risks. Root Causes of Cable Tray Cover Detachment Loose or Insecure Fastening: If covers are not properly snapped into place or if fastening screws are inadequately tightened during. Short circuits occur in all phases of the cable, which will also trigger the interlocking reaction of the current relays and voltage relays on the distribution cabinet.
