# **Ceramic Fuse Assembly Standards**

## Overview

---

The IEC 60269 series is the cornerstone of fuse standards developed by the International Electrotechnical Commission. This series provides a comprehensive framework for the classification, dimensions, performance, and testing of fuses. Rauschert has developed an innovative insulating ceramic made of zirconium silicate especially for spark chambers and. Standard Ratings: Glass fuses are typically rated for up to 250 volts and are available in a wide range of current ratings. Components for low voltage D and D0 fuse applications As one of five largest producers of fuses in the world and co-creators of international standards ETI has many years' experience in technical ceramics for fuses and special equipment for large-series production of all ceramic elements in D and. Product lines, such as Protistor® PSC Square Body ceramic semiconductor fuses, have been developed.
