Columbia Server AI

Columbia Server AI

High Performance Computing -- HPC

CUIT's High Performance Computing service provides a cluster of computing resources that power transactions across numerous research groups and

Columbia MCP Servers MCP Server

Columbia MCP Servers is a repository that contains the deployment infrastructure and server implementations for Columbia's Model Context Protocol (MCP) servers, designed to facilitate AI

About Columbia AI

The initiative enables Columbia's schools, institutes, centers, and affiliates to lead and contribute to the future of AI--through coordinated, distinct efforts, supported

Inside the World's Largest AI Supercluster xAI Colossus

We FINALLY get to show the largest AI supercomputer in the world, xAI Colossus. This is

the 100,000 (at the time we filmed this) GPU cluster in Memphis Tennessee that has been on the news a lot.

Columbia University Information Technology

CUIT is committed to delivering high-quality, stable, and secure technology solutions and services to the Columbia community while providing the IT Leadership

AI Services

Google Gemini Google Gemini is now available to the Columbia University community. This service provides access to Google's most advanced AI models in a secure, education-focused environment.

AI Tools and Resources , Columbia Business School

Generative AI for Teaching Excellence This page offers curated resources to help faculty integrate generative AI into their courses effectively.

Remote Access Tools

Secondary Remote Access Tools Virtual Private Network (VPN) Access Faculty and staff can use Virtual Private Network (VPN) technology to connect to Columbia's network, systems, file shares, email

COLUMBIA-MCP-SERVERS MCP Server , JuheAPI

Provides a scalable, containerized infrastructure for deploying and managing Model Context Protocol servers with monitoring, high availability, and secure configurations.

Columbia MCP: Deployment Infrastructure & Servers

Columbia offers a robust infrastructure for deploying and managing Model Context Protocol (MCP) servers. It provides a complete ecosystem for managing services with Docker-based deployment,

Cologix and Lambda Launch First NVIDIA HGX B200

After standing up AI infrastructure in Chicago in 2024, this strategic collaboration brings Lambda's NVIDIA GPU-accelerated 1-Click Clusters (TM) to

Columbia MCP Servers MCP Server

As an MCP (Model Context Protocol) server, Columbia MCP Servers enables AI agents to communicate effectively through standardized interfaces. The Model Context Protocol simplifies integration

Columbia, NYPD investigating hourslong University IT

News , Administration Columbia, NYPD investigating hourslong University IT outage A University official wrote in a statement to Spectator that

Empire AI , Columbia University Information Technology

Empire AI provides a range of compute nodes and storage options, each with varying performance levels and costs. To ensure consistency in measuring and managing usage, all resources are

Columbia MCP Server - Overview , MCP Marketplace

With its robust features, scalability, and security, MCP servers provide a reliable infrastructure for integrating AI models with external data sources. As AI continues to transform industries, the

Central Server

This process will ensure that access to resources on CUIT's central server is granular and role-based. The CUIT Client Services (CSS) group is happy to consult with your departmental liaison regarding

Artificial Intelligence

AI research at Columbia CS focuses on machine learning, natural language and speech processing, computer vision, robotics, and security. AI researchers

Columbia

Columbia's 'mcp server' solution is packed with features designed to streamline deployment and management. At its heart is a robust Docker-based deployment system, making it easy to package,

Lambda and Cologix launch the first NVIDIA HGX B200

After standing up AI infrastructure in Chicago in 2024, this strategic collaboration brings Lambda's NVIDIA GPU-accelerated 1-Click Clusters (TM) to

Virtual Server Hosting

Virtual Server Hosting Virtual machine environments hosted and managed by CUIT, available to be administered by Columbia employees. Also known as Infrastructure as a Service (IaaS). The CUIT

AI in Research , Columbia Business School

Google Gemini Google Gemini is now available to the Columbia University community. This service provides access to Google's most advanced AI models

MCP-Mirror/smithery-ai_COLUMBIA-MCP-SERVERS

Columbia MCP Servers This repository contains the deployment infrastructure and server implementations for Columbia's Model Context Protocol (MCP) servers.

Columbia University in the City of New York

Columbia Today and Beyond Columbia prepares the next generation of thinkers, scientists, artists, and leaders through an education grounded in intellectual rigor,

Columbia University student data stolen by politically

A politically motivated hacker breached Columbia University's data systems last week, stealing student records and causing widespread disruptions.

Service Desk , Columbia University Information Technology

The CUIT Service Desk supports the University by providing best-in-class service to CUIT's customers. Our goal is to provide customer satisfaction, and assure you, our customer community, that your

Google Gemini

Google Gemini is now available to the Columbia University community. This service provides access to Google's most advanced AI models in a secure, education-focused environment. Gemini supports

Columbia MCP Server-Bereitstellungsplattform

Bereitstellen, verwalten und überwachen Sie die MCP-Server von Columbia mit dieser Docker-basierten Plattform, die hohe Verfügbarkeit, Sicherheit und Skalierbarkeit bietet.

Remote Access Services--VPN and Citrix , Columbia

If you are a CUIT customer that pays for access to the Columbia Central Server, you can use CUIT Citrix to access certain applications and resources on the server.
