Common Sorting of Optical Cables

Overview

In this guide, we'll explore a wide range of fiber optic cable types, classifying them by environment (indoor vs. outdoor) and use case (aerial, direct buried, armored, underwater, duct, flat drop). Unlike copper wires, which are limited by lower data transmission speeds, shorter transmission distances, and higher susceptibility to electromagnetic interference, fiber optic. In the landscape of network infrastructure, three primary cable categories dominate connectivity: twisted-pair copper cables, coaxial cables, and fiber optic cables.
