Connector Box 36 Cores

Overview

This 36 Cores Fiber Optic Distribution Metal Box with internal structural parts, optical fiber connector, optical splitter (optional) and accessories, can be installed in wall, pole and other positions. 36 cores 1X16 splitter fiber terminal box is installed in the clean room to protect the fibers of indoor optical cable through splicing, cable connection and splicing work can be carried out in the same box. With 36 core capacity to connect 36 users in the network building system, simplify the. The fiber splicing, splitting, distribution can be done in this box, and meanwhile it provides solid protection and management for the FTTx.
