# **Cost-effective Fiber Ethernet Switch QSFP28**

## Overview

---

Among the many 100G optical interface types, QSFP28 100G DR1 stands out as a simple, cost-effective, and power-efficient option for 500 m single-mode fiber links. In this guide, we provide a comprehensive, practical overview of 100G QSFP28 modules, covering their working principles, module types, key specifications, typical applications, and a step-by-step selection framework to help you make confident, informed decisions for your network. This guide provides the definitive roadmap for selecting, deploying, and troubleshooting QSFP28 transceivers while bypassing the painful trial-and-error phase. QSFP28 (Quad Small Form-Factor Pluggable 28) is a compact transceiver form factor designed for high-capacity 100G Ethernet. With up to 100 Gbps speeds, it is frequently used within data centers, enterprise networks, and telecommunications.
