D box distribution box

Overview

One critical component of a septic system is the distribution box (also called a d box). A septic distribution box, also known as a D-box, is a small container that receives the effluent from the septic tank and distributes it evenly to the network of attached drain fields and pipes. Without it, wastewater would flood one section of the drain field while starving others, causing premature system failure.

D box distribution box

Distribution Box in Septic Systems: Role and Maintenance

A distribution box -- commonly abbreviated as a D-box -- is a concrete, plastic, or fiberglass chamber positioned between a septic tank and a drain field to divide clarified effluent into equal flows across
