# **Data Center Infrastructure Micro-Modules**

## Overview

---

The architecture of micro-module data centers is centered on "modularization, high efficiency, and intelligence," achieving performance optimization through the collaborative design of four major systems: physical, electrical, refrigeration, and monitoring management. Northstar Enterprise + Defense offer solutions with speed, performance and security in mind (Credit: Northstar Enterprise + Defense) Northstar Enterprise + Defence delivers turnkey solutions for AI/ML, enterprise, telecoms, defence and government applications, with a specialised focus on modular. A modular data center is a complete data center, or a critical-infrastructure subsystem, that is engineered, integrated, and tested in a factory before being delivered to site. The category spans 30 kW micro-modules tucked inside an enterprise floorplate, containerized 500 kW edge units. Delta InfraSuite is a new generation, highly integrated modular datacenter solution.
