# **Data Centers of Large Internet Enterprises**

## Overview

---

In total, the 10 largest providers and operators of data centers, including Amazon Web Services (AWS), Microsoft Azure, Google Cloud, Meta Platforms, Equinix, Digital Realty, NTT Global Data Centers, CyrusOne, GDS Holdings, and KDDI's Telehouse, operate over 1,250. Data center development has entered a historic growth phase, supported by AI adoption, cloud expansion, and global digital infrastructure needs. Sources: Webopedia, Data Centre Dynamics, Statista, and operator announcements, such as those from Switch, Vantage, or Digital Realty. China Telecom - Inner Mongolia Information Park China Telecom's Inner Mongolia Information Park is the largest data centre in the world, measured by floor space. Telehouse Telehouse pioneered the European carrier-neutral data centre, opening its first London Docklands facility in 1990. As cloud providers and technology companies race to build infrastructure for the next generation of AI models, the scale of new facilities has jumped from hundreds of megawatts to the gigawatt range in just a few years.
