# **Dimensions of fastener strips for household electrical distribution boxes**

## Overview

---

The most common screw size for electrical boxes is #6-32, which is suitable for standard outlet boxes and switch boxes. However, for heavier applications, such as ceiling fans or light fixtures, you may need to use a larger screw size like #8-32 or #10-32. Using the correct type and size of screw ensures components remain stable and that safety mechanisms, such as grounding, function as intended. Several filters are included below to help make your document search more efficient. C is tested, enclosures suitable for installation into concrete with a maximum temperature during the casting process further testing.
