# **Distribution Box GCS**

## Overview

---

This low-voltage complete distribution unit is used in three-phase AC systems with frequencies of 50 (60)Hz, rated voltages of 380V (400V) or 660V, and rated currents up to 4000A, for power distribution, centralized motor control, and reactive power compensation. The GCS system is suitable for power distribution networks in industries such as power generation, petroleum, chemical, metallurgy, textiles, and high-rise buildings. GCS low-voltage withdrawable switchgear, also called low-voltage drawer cabinet, is designed and developed by the two joint design teams according to the requirements of industry authorities, the majority of power users and design units, which meets national conditions, has high technical. Today, it is a widely recognized piece of equipment in China and internationally. According to the power industry ministry standards and user requests, the GCS low voltage switchgear.
