Distribution box dtxapxfx

Overview

The hub distributes electrical power from a single input source to various circuits throughout a building. High-quality materials and robust product designs ensure a reliable connection, signal transmission and power. -The bottom shell and surface frame are made of PC newmaterial,while the transparent cover is made of PC newmaterial,which has characteristics such as good toughness,high strength,good impact resistance,and long service life. Distribution boxes with M8 and M12 connection cables made on both sides facilitate the wiring of sensors and actuators (short cable routes and less wiring effort). Our range of distribution boards provides utmost safety as per international standards.
