Do I need a switch when installing fiber optic internet at home

Overview

Do I need special equipment for fiber optic internet?

No, you should not need anything special. In this article we'll break down how fiber internet is installed - from the network fiber drop outside your house to the in-home setup with your router and gateway - and what you should expect at each stage. A fiber-optic switch allows you to connect two or more fiber-optic cables to form a network. Many providers require existing fiber infrastructure for a successful installation.
