Do I need to install an in-house electrical distribution box

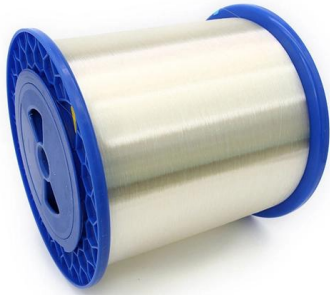

Overview

Every building with electrical service needs a properly installed electrical distribution box to meet National Electrical Code (NEC) Article 408 requirements. These aren't optional guidelines—they're enforceable standards that protect lives and property. Choose the right box based on environment (indoor/outdoor), load capacity, and durability. A distribution box, also known as a fuse box or power distribution box, is the heart of the domestic electrical installation. It is used to distribute the electricity supplied by the energy supplier to the various circuits within a building.
