Do I need to unplug the router s fiber optic cable

Overview

Yes, you can unplug your fiber optic cable, but it's crucial to do so with extreme care to avoid damage, contamination, and service interruption. This guide outlines proper methods to safely remove fiber optic cable from modems in your home or office. Is it safe to disconnect a yellow cable + green connector Optic Fiber setup from router?

Hello all, I'm sorry for the possibly dumb question but I need to move my router and noticed the technician left my Optic Fiber cable very twisted and short in usable length when I had my service installed. Fiber optic cables are different from traditional copper cables, as they use light to transmit data, and the connectors are more sensitive. You can remove and replace them without powering off the device, but the routing function is interrupted until you replace the component.
