Do I still need a router after installing fiber optic internet at home

Overview

While fiber internet doesn't require a modem, you still need a router to distribute the connection across your network. Your router works hand-in-hand with the ONT, taking the internet signal and spreading it wirelessly or through Ethernet cables to all your connected devices. Your ONT handles signal conversion, eliminating the need for a traditional modem altogether. Think of the ONT as a high-tech bridge between your ISP and your internal network – but engineered specifically for fiber's unique data. Choosing a fiber-ready router is essential to maximize the benefits of fiber internet; ensure it supports high speeds and modern Wi-Fi standards.

Do I still need a router after installing fiber optic internet at home

Everything you need to install fiber-optic internet

Unfortunately, fiber is not available everywhere. It's expensive for internet providers to build out, so they tend to focus infrastructure in highly populated areas. If fiber is available at your
