

**Adam Tas Corridor Energy**

# **Do cable trays need ladders**

## Overview

---

While cable trays are more flexible and easier to install and maintain, cable ladders can support heavier cables over longer distances. Ultimately, your decision should be based on factors such as cable capacity, space availability, and budget. A cable ladder, also known as a ladder cable tray, is a support system that consists of two longitudinal side rails connected by individual rungs. With experience in the electrical industry, I've found choosing the correct cable management solution critical to maintaining. Already know what you need for your project?

Contact us, and a member of our helpful team will be happy to assist. Whether you're running power cables, data lines, or control wiring, the right choice between cable trays, baskets, ladders, and trunking can save time, reduce maintenance, and extend system.
