# **Do jumpers and pigtails function the same way**

## Overview

---

Pigtails are usually used inside terminal boxes, connecting the fibers in the optical cable to the jumper. Jumpers have connectors on both ends and are mainly used to link pigtails and devices. Fiber optic jumpers are used as jumpers for equipment to fiber optic cabling links. In the world of Fiber Optic communications, jumpers, pigtails and leather wires are three indispensable connection components, each of which performs a specific function.
