Does fiber optic broadband still require a router

Overview

While fiber internet doesn't require a modem, you still need a router to distribute the connection across your network. Your router works hand-in-hand with the ONT, taking the internet signal and spreading it wirelessly or through Ethernet cables to all your connected devices. Unlike DSL or cable internet, fiber optic connections operate differently, though a fiber ready router is recommended to fully leverage the speed and capabilities of fiber optic internet.

Does fiber optic broadband still require a router

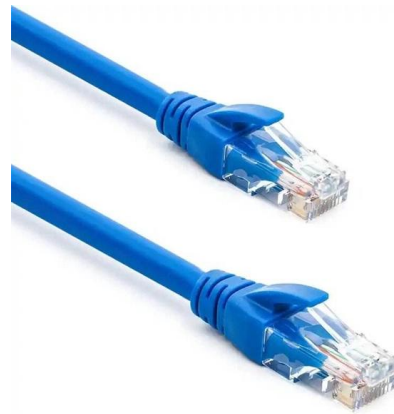

Does Fiber Internet Need a Modem?

Fiber internet doesn't need a modem but requires an ONT to convert fiber signals for your router. Learn how fiber ONT works and how to set it up
