Does the AP panel have a fiber optic port

Overview

The 370 Series access point is equipped with one 1000 Base-X small form-factor pluggable (SFP) port for fiber-optic network connections. The applicable SFP modules includes: AP1572E has four dual band antenna ports, to which external antennas can be mounted to or connected to, as specified in Table 4-1. Before delving into the installation process, it's essential to gather the necessary components: Designed to convert electrical signals from the AP into light signals that can travel over the fiber optic cables, the 10G fiber media converter can effectively extend the reach of Wi-Fi 7 AP over. Due to distance between the buildings, there's a fiber patch panel between our main server room and the workshop. 4GHz Vpol omni-directional N-type BLE antenna is included in the package of the AP-584 access point.
