Electric Heating Curtain Distribution Box

Overview

The distribution box, as the "control core" of the electric heating cable system, enables zoned temperature control and data recording, providing early warning of freezing and blockage risks, and ensuring stable heating of long-distance pipelines. STAHL's lighting and heating circuit distribution systems are available; coupled with the customer-specific options on offer, these systems are incredibly versatile. Delvalle is a world-class manufacturer hazardous area Marshalling / Distribution Box for deployment in refineries and chemical plants and many other hazardous area applications and Marshalling Box for heat tracing. Industrial long-distance pipelines are characterized by long distances and complex environments. Software solutions with TRACE-VISION and integrated bas lutions for specific require ol can be used in hazardous areas.
