Equipment that can be assembled into network cabinets

Overview

Equipment designed to be placed in a rack is typically described as rack-mount, rack-mount instrument, a rack-mounted system, a rack-mount chassis, subrack, rack cabinet, rack-mountable, or occasionally simply shelf. A Network Cabinet, often interchangeably called a server rack, is a physical frame or enclosure designed to house and organize various types of network hardware and accessories. Built for durability, flexibility, and efficiency, our solutions ensure your equipment is organized, secure, and optimized for peak performance. Whether you're setting up a new office or streamlining an existing network, understanding the importance, types, and usage of network cabinets is crucial. Enconnex designs and manufactures a comprehensive selection of racks, cabinets, enclosures, and accessories. Our flagship data center cabinet, InfiniRack, is nearly endlessly configurable, ensuring you get the perfect solution for your unique environment.
