European Tower Communications Station

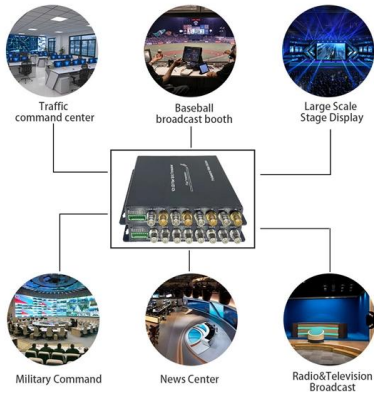

Overview

With the new antenna, the tower became capable of broadcasting high-definition digital television signals using the standard (which is the European counterpart to the used in the United States). We offer solutions and services to deploy and support wireless networks in 22 countries located across 5 continents. Our largest operation is in the United States; visit the United States website or any of our country sites. Cellnex, Europe's leading operator of wireless telecommunications infrastructures, recently experienced a significant change with the departure of its CEO, Tobias Martinez, after an eight-year stint. An extensive portfolio from radio towers to rooftop sites Deutsche Funkturm operates more than 36,200 radio sites. As part of this network, we own, manage and develop high capacity telecommunications towers and we.
