FC Interface Standard Thread Size

Overview

The FC connector is a with a threaded body, which was designed for use in high-vibration environments. It comes in UPC or APC polishes, offering great performance and value, available either pre-assembled or in an assembly kit for easy installation. Available with PC polishing, advanced PC(AdPC) polishing and Angled PC(APC) polishing. Defines the standard interface dimensions for the type FC-PC family of connectors. The FC/PC (Physical Contact) and FC/APC (Angled Physical Contact) connectors are standardized under TIA EIA/TIA-604-4 and IEC 61754-13. For APC Connectors, understanding the difference between step and conical ferrules is crucial for proper polishing.

FC connector

The FC connector is a fiber-optic connector with a threaded body, which was designed for use in high-vibration environments. It is commonly used with both single-mode optical fiber and polarization-maintaining optical fiber. FC connectors are used in datacom, telecommunications, measurement equipment, and single-mode lasers. They are becoming less common, displaced by SC and LC connectors. The FC connector h
