# Fiber Optic Bare Fiber Test Coupler

## Overview

---

FC Bare fiber adapter is a very efficient media to connect bare fiber to fiber optic device, it usually used in installation to test links. In addition, custom fiber patch cables can be ordered and shipped within 24 hours. There are two reasons we may want to test bare fiber, by that we mean fiber that has not been terminated in connectors but is simply plain optical fiber, The first one is to ensure the fiber or cable being manufactured meets its specifications, as is done by every manufacturer. The system utilises replicable index matching gel cartridges which results in quick low loss, low reflectance connections to your OTDR or other systems.
