Fiber Optic Cable Laying Requirements and Standards

Overview

The Fiber Optic Association (FOA) recently published a standard titled "FOA Standard For Installing Fiber Optic Cable Plants. (FOA) was founded in 1995 to help develop the workforce to build the fiber optic networks to support a rapid expansion in communications and the Internet. Recommendations for Fiber Optic Cable Installation Where reels are supplied with protective material fitted over the cable, the protection should remain in place until the cable will be installed. They define a minimum baseline of quality and workmanship for installing electrical products and systems.
