Fiber Optic Cable Online Monitoring Price

Overview

CRU provides comprehensive, accurate and up-to-date price assessments and research reports for bare optical fibre across various key regional markets, combined with insights into the factors and events affecting markets. Before looking at the price, it is important to explain the source of the price data. PacketLight's PL-1000D fiber monitoring system constantly and non-intrusively monitors wavelength quality and faults in the fiber. Fiber-optic cable materials typically cost \$1 to \$6 per linear foot, depending on fiber count and cable type. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000. Single-mode fiber costs less per foot than multimode fiber, but it requires more.
