Fiber Optic Cross-Connect Box

Powered by Adam Tas Corridor Energy

Overview

The Cross Connection Cabinet (FDC) provides a secure transition point from the passive optical network (PON) to the subscriber drop for both pre-configured pigtail and/or patch and splice applications. Corning's family of optical cross-connects (OCCs) are versatile, fully enclosed cabinets designed for fiber optic rack-mountable hardware. All products in this family offer modular design for incremental growth and are ideal as outdoor protected environments for cross-connect installations. The HTB8067 24 Port Indoor Fiber Optic Distribution Box is designed for clean, efficient cross-connection between outdoor backbone cables and indoor subscriber fibers. Ideal for FTTH applications, this compact wall-mountable cabinet integrates termination, splicing, and distribution functions in.
