Fiber Optic ODF rack 144 incoming line standard

Overview

This 144C modular ODF is composed of 12pcs pre-loaded 12C splicing and patching unit that includes FC/SC/ST/duplex LC compatible adaptors, pigtails and 12 core splice tray. Integrated design provides OSP cable fibers and pigtail splicing, patch-cord termination and. Optical Distribution Frame (ODF) is a device used in fiber-optic telecommunications networks to connect, manage and distribute optical fibers from incoming and outgoing cables. The term "144-core" refers to the number of individual fiber optic cores or strands that the ODF can accommodate. Unlike standard racks and fiber optic panels, they are modular and agile, specifically designed for today's fast.

Optical Distribution Frames (ODF) for Central Office/Headend

CommScope's optical distribution frames (ODF) and racks are designed to fit a variety of fiber cabling applications. Each ODF type is designed with an emphasis on superior cable management and ease

Comprehensive Guide to Optical Distribution Frames

Therefore, a reliable ODF should possess a protective mechanism to shield fiber optic connections from potential damages caused by dust or physical stress.
