# **Fiber Optic Switch Landline**

## Overview

---

With VoIP (Voice over Internet Protocol), you can easily port your number, enjoy crystal-clear call quality, and future-proof your setup ahead of the UK's 2027 copper switch-off. Full fibre refers to an internet network that uses fibre-optic cables directly to your home. Below, we explain how that works, what to expect on the day, and the simple steps that help you avoid. SOGEA (Single Order Generic Ethernet Access) is leading us into a "Data-Only" era. How will the landline phone switch work and what do you need to do?

The old copper phone network will be switched off in 2025 and phones will instead use the internet to make calls. That doesn't mean you have to only use a mobile phone - but there are some changes coming.
