Fiber optic box splicing pigtail

Overview

The quality of fiber pigtail is typically high because the connectorized end is attached in the factory, making it more accurately than a field-terminated cables. Given the access to a fusion splicer, you can splice the pigtail right onto the cable in a minute or less, which gre. Fiber optic pigtail are utilized to terminate fiber optic cables via fusion or mechanical splicing. Patch cord fibers are usually jacketed, whereas fiber pigtail cables are usually unjacketed for they are usually spliced and protected in a fiber splice tray.
