## Overview

---

Factors: Cable weight (kg/km) Ice loading (up to 50mm thickness) Urban Areas: 25–40m spacing (concrete poles, 10–12m height). (FOA) was founded in 1995 to help develop the workforce to build the fiber optic networks to support a rapid expansion in communications and the Internet. Recommendations for Fiber Optic Cable Installation Where reels are supplied with protective material fitted over the cable, the protection should remain in place until the cable will be installed. Some key considerations for installing optical fiber cable are highlighted below.
