# **Fiber optic connection to router is slow**

## Overview

---

Here are some tips to make your fiber internet faster, addressing typical slow connection issues. In this guide, we'll walk you through a series of simple steps that can help you identify and resolve the most frequent culprits behind slow fiber internet speeds so you can get back to enjoying your online activities without interruptions. I was expecting dl speeds of 900+ on wired connection and 600+ on wifi when close to router, what I am getting is 100 (dl) on wired and max of 350mb on wifi when sitting on top of the router, other rooms in my apartment are getting 50-200~ on the wifi network. The advertised speed is 10MB/s (I'm from Costa Rica and these speeds are quite normal here) and while loading videos, apps, etc, it works very well, almost instant. Fiber optic networks are celebrated for their speed and reliability, but even the best systems can encounter problems.

## Fiber optic connection to router is slow

---
