Fiber optic router has signal but no network connection

Overview

Restarting your router, checking your modem connection, and resetting network settings often resolve the problem quickly. We have a fibre run, SM, 650 meters, with Level1 dumb switches at each end, I get Link lights at both ends, but there's no network traffic. Fiber optic networks are celebrated for their speed and reliability, but even the best systems can encounter problems. When issues like signal loss, slow speeds, or intermittent connectivity arise, systematic troubleshooting is key. These high-speed, high-capacity communication networks are increasingly replacing copper cables, offering superior performance and. If your router shows it's connected but you can't access the internet, don't panic—this is a common issue with simple fixes.
