# **Fire Protection Primary Distribution Box**

## Overview

---

PIP-1AN/Distribution box is intended for use in fire alarm systems (FAS) as part of a cable assembly. ABB offers an innovative enclosure system for fire prevention, which is constructed of fireproof materials, features optimum technology and is available in a variety of economical designs. A wide range of wall enclosures (flush/surface/enclosure) and floor-standing enclosures (surface) are. In the event of a fire, only absolutely reliable products prevent the spread of fire and guarantee safe function of electrical systems relevant for rescue and escape in buildings and tunnels, such as emergency lighting and smoke extractor systems in escape and rescue routes. During this period\*, OBO systems for the maintenance of electrical function to E30 maintain the flow of energy for: To support firefighting operations, it is imperative that certain technical equipment is supplied with power for a sufficient period of time after a fire breaks out. The fire protection junction M-BOX is designed for connecting and/or branching cables of installations which guarantee continuous operation during fire conditions.
