

**Adam Tas Corridor Energy**

# **French Optical Cable Project**

## Overview

---

project is to build an FTTH (Fibre to the Home, connecting optical cables to homes) communication network throughout France by 2025. LS Cable & System has been participating in this project and supplying optical. The historic, next-generation 550km cable is the first fibre-optic subsea cable to be built across the English Channel in nearly twenty years and will connect Slough, United Kingdom and Paris, France. The national digital connectivity programme 'France Très Haut Débit' sets a target of fibre for all. In March 2025, Nexans signed a framework agreement with RTE (Réseau de Transport d'Électricité) worth above €1 billion for high-voltage direct current (HVDC) export and land cables serving multiple offshore wind farms.

### **Big Tech and the AI investment boom in underwater cables**

Investment into new subsea cable projects is expected to reach around \$13 billion between 2025-2027. Tech giants Meta, Google, Amazon and Microsoft are investing in the cables as

### **Orange announces landing of new transatlantic submarine cable in France**

Global telco claims significant reinforcement of connectivity and resilience after landing in western France with two next-generation transatlantic submarine cables.

### **SPLANG and EllaLink unveil plans for building a direct**

SPLANG, part of Collectivité Territoriale de Guyane (CTG) and the associated municipalities of French Guiana, has awarded the establishment of an

### **Crosslake Fibre to Build CrossChannel Fibre System**

The historic, next-generation 550km cable is the first fibre-optic subsea cable to be built across

the English Channel in nearly twenty years and will

### **Current Status and Future Prospects of the SuperRail Project in France**

This paper will describe the current status of the project, as well as the selected cable and cooling system technologies. In addition, results of prospective studies on the reduction of losses in the

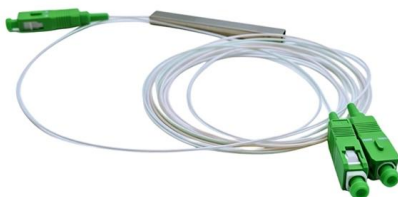

### **Installation of fiber optic cable between the US, France**

The installation of a 6,783 km transatlantic submarine cable between the United States, France and Great Britain has been completed, the consortium of

### **France's RTE signs billion euro cable supply agreement**

Nov 5 (Reuters) - France's electricity transmission system operator RTE on Tuesday announced a billion euro (\$1.09 billion) contract with European suppliers,

## FTTH Round Fiber Drop Cable: Orange France's High-Speed Fiber

As Europe accelerates its digital transformation, France has emerged as a pioneer in fiber optic infrastructure, with ambitious goals to deploy high-speed connectivity nationwide. In 2023, our

## Streamlining conversion to fibre-optic cables will

Streamlining conversion to fibre-optic cables will enhance Europe's competitive edge. Many European countries are struggling to upgrade their

## SubCom awarded to build underwater fiber optic cable

--This news article is quoted from gCaptain. SubCom, a U.S.-based telecommunications company, has been awarded a \$600 million contract. It will

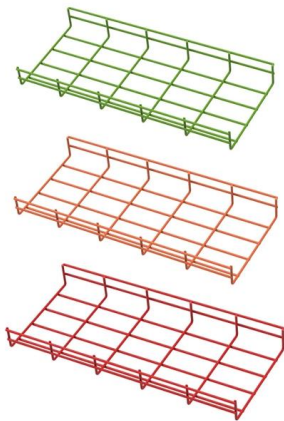

## France's Energy Transition: Cable Solutions & Nexans RTE Analysis

Many export and land cables for major French projects now include one or more fiber optic bundles inside the design. These fibers capture operating data such as temperature, strain, and

## France's Optical Fiber Cables Market Report 2026

The French optical fiber cables market stands as a critical and dynamic component of the nation's digital infrastructure, underpinning its ambitious connectivity goals. This report provides a comprehensive

## Meta plans to build a \$10B subsea cable spanning the

TechCrunch has confirmed with sources close to the company that Meta plans to build a new, major, fiber-optic subsea cable extending around the

## Optical Fiber Engineering: Morocco-Germany project to create nearly

Morocco and Germany have agreed on a pilot project expected to create 9,500 jobs in optic fiber engineering, which is becoming very important in today's modern telecommunication.

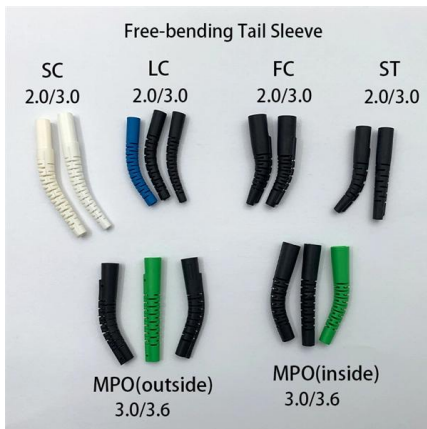

## Orange takes a leading role in the US to Europe route with two new

With these two new systems, the French operator demonstrates its global submarine cable credentials and expertise. Orange continues to make substantial investments in international connectivity

## Crosslake Fibre to Build CrossChannel Fibre System

Crosslake Fibre announced on Tuesday its newest subsea cable project, CrossChannel Fibre. The historic, next-generation 550km cable is the

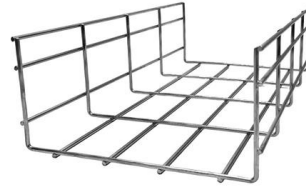

## Your Sustainability Transformation Partner , Fujitsu Global

Our purpose: Make the world more sustainable by building trust in society through innovation.

## French Project Takes Dynamic Subsea Cable Monitoring Tech to Sea

A sea trials campaign for monitoring dynamic subsea power cables was conducted from 1 to 6 July in the Bay of Douarnenez, France. The trials are part of the HT-20MW project that aims to

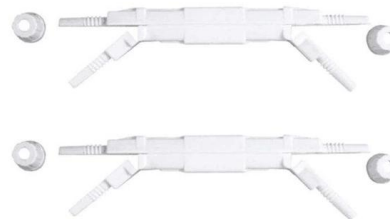

### CrossChannel Fibre

The cable system allowed Crosslake Fibre to connect the London suburb of Slough, UK to Paris, France, with landings in Brighton and Hove, UK, and the French

### Digital connectivity in France

The French digital connectivity target defined by the France Très Haut Débit is to extend fibre to subscribers throughout the country by 2025. France predominantly opts for establishing and

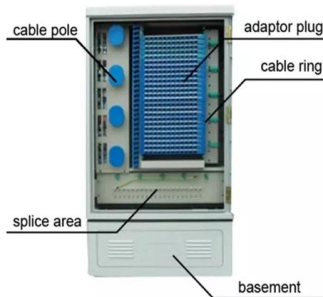

### France Transitions from Copper to Fibre Optic: What
