Greek-branded optical module 40G

Overview

ATGBICS QSFP-40G-LR4 is a transceiver module designed for 10km optical communication applications. The Cisco ® 40GBASE QSFP (Quad Small Form-Factor Pluggable) portfolio offers customers a wide variety of high-density and low-power 40 Gigabit Ethernet connectivity options for data center, high-performance computing 00networks, enterprise core and distribution layers, and service provider. QSFP plus is a 40G optical module package defined by the IEEE organization, which greatly meets the market demand for high density and high speed. The 40G QSFP optical module is a compact hot-swappable light module with four transmission channels, each with a data rate of 10Gbps, and is compliant.
