High-precision Belgian high-voltage complete sets of equipment

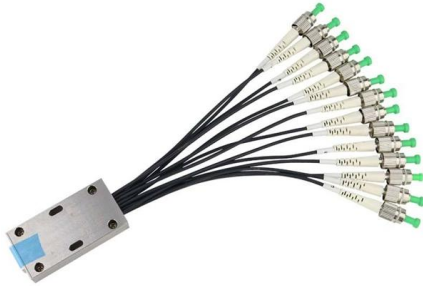

Overview

We offer a complete range of test and measuring devices for low, medium and high voltage. Newelec's High Voltage department studies, designs, and delivers turnkey HV projects, renowned for their technical sophistication, safety, and adaptability across all Belgian public and private networks. Each High Voltage project is custom-built, in strict compliance with European and. Founded in Brussels in 1937 and based in Louvain-la-Neuve since the 1990s, JEMA combines more than 80 years of expertise in magnetic products (transformers, inductances) for railways and telecoms, 45 years in particle accelerators and 10 years in energy transition. As a large enterprise or industry that is fully electrifying, you need a high-voltage installation to ensure a stable, continuous power supply. An overview of our product range: DC/DC converters as print, built-in or 3U cassette versions with power up to 150 W AC/DC power supplies as desktop or 19" rack version with power up to 10 kW Integrated HV supplies for photomultiplier tubes (PMT) HV systems in different. STEVO Electric was founded in 1999 to distribute both high and low voltage test equipment for the energy sector in the Be-Lux region.
