

How is the cable management frame

Overview

The cable management frame is primarily used in access points in FTTH networks. The frame consists of a main part where the closure is fastened with a strap (included) and a pole part that is mounted to the pole. As businesses increasingly rely on robust network infrastructure, proper cable organization becomes critical for. Connect a minimum of two MGMT ports from separate frames in each management ring to the management network.

How is the cable management frame
