# **How much does a 3000-meter 24-core optical cable weigh**

## Overview

---

Calculate cable weight from length and weight per meter, or estimate total weight by cable size, material, core count, and insulation. Fiber optic cable is a cable containing one or multiple optical fibers that are used to transmit the signal. The optical fiber elements are typically individually coated with layers and contained in a protective tube suitable for the environment where the cable will be deployed. Excel OM4 50/125  $\mu\text{m}$  loose tube optical fibre cables have been designed specifically for internal and external applications. Therefore, in many cases, you need to know how to calculate the weight of a cable or wire.
