## Overview

---

This fiber is a graded-index multimode fiber suitable for transmission speeds of up to 10 Gb/s. Excel OM4 50/125  $\mu\text{m}$  loose tube optical fibre cables have been designed specifically for internal and external applications. The cables are constructed with a single dry loose tube containing up to 24 colour. Core size determines performance: Single-mode (9  $\mu\text{m}$ ) is ideal for long distances; multimode (50  $\mu\text{m}$  or 62. But what makes it so special, and why should you care?

Buckle up; we're about to get into the nitty-gritty.
