How to arrange bundled optical cables

Overview

This document describes the specifications for preparing, routing, and bundling cables and attaching labels to these cables. Additionally, when routing cables on the cable trays, it's necessary to use zip ties to bundle and secure them at regular intervals, ensuring neat and organized cable routing. Where reels are supplied with protective material fitted over the cable, the protection should remain in place until the cable will be installed. (FSI), a pioneer in fiber optics technology since 1982, specializes in delivering both standard and custom fiber optic solutions tailored to meet the intricate demands of diverse industries.
